APPs at school

by Luca Natali and
Laura Grano

Introduction to Study Apps

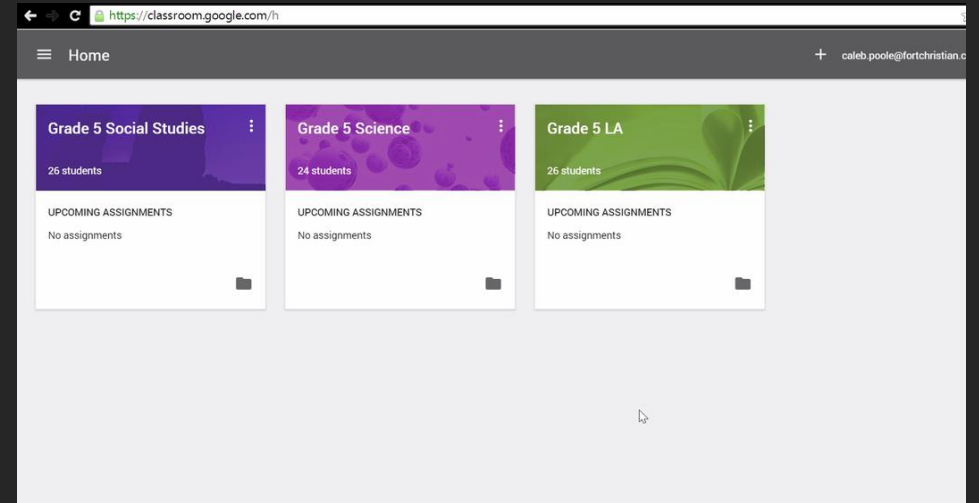

In recent years, apps have become very important for studying any subject, but also for organizing tasks and boost productivity.

Let's see some study apps and what subjects they are used

GOOGLE CLASSROOM

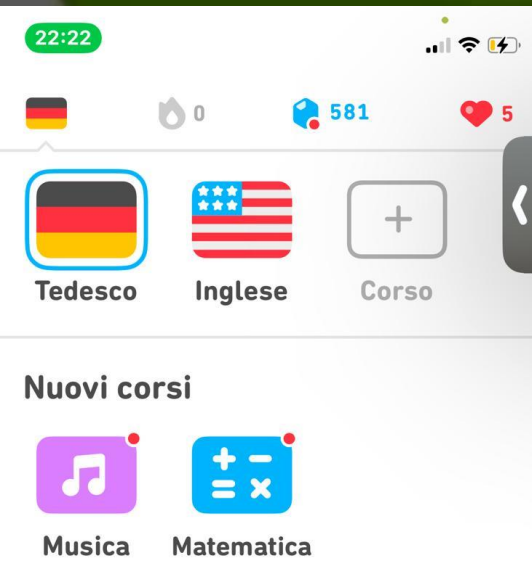

Google Classroom

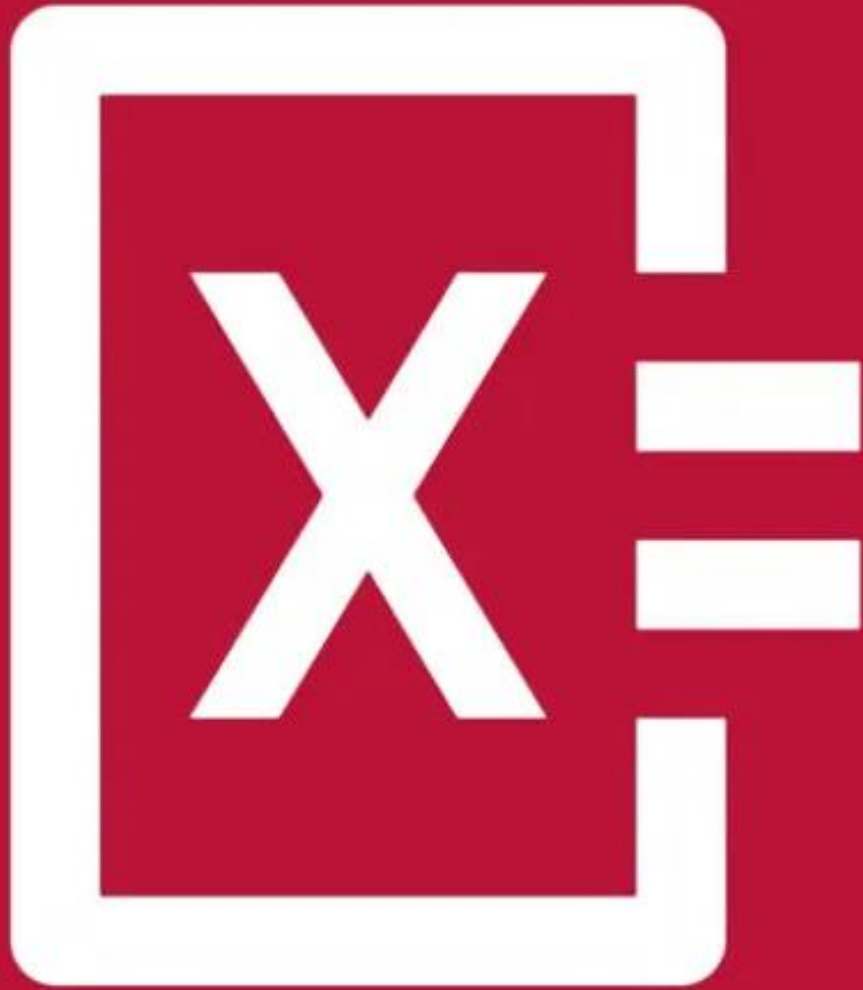

Google classroom is used by **teachers** and **students** to share **school material**. "Rooms" are created with the specific subject (like History, Physics, Geography, etc.) but it is used more for **informatics**

DUOLINGO

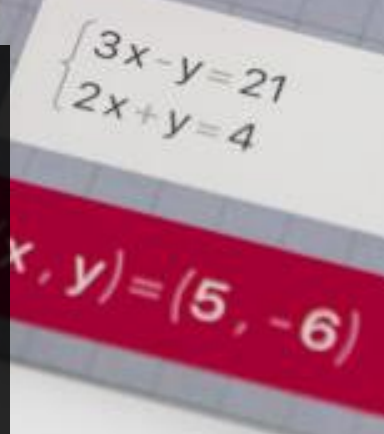

It is used by students to **learn languages** (especially English). It is divided into **levels**. Recently **Mathematics** has been introduced, but it is still used for languages more.

PHOTOMATH

photomath

Only usable for **Maths**, just take a picture of the notebook and the app will solve the problem **explaining** the steps to follow. If you want **lessons** on a topic you have to pay the **subscription**.

KAHOOT

CHATGPT

ChatGPT is an **artificial intelligence** created by **OpenAI**. It is designed to help people by answering **questions**, having **conversations**, or providing **information**. ChatGPT works by using a large amount of text data to understand and **generate** responses in a way that sounds natural.

ChatGPT

SPOTIFY

It could sound unusual to find a music app useful for studying, but many students find it relaxing, helpful to relieve stress and a good way to stay focused on studying while listening to favourite songs.

SIDER

Did ever happened to you that you had to study pages and pages in a very short time? Sider is an AI that summarizes everything, YouTube videos, lectures and podcasts, so it doesn't matter whatever you use for studying, Sider is a life saver in these situations!

Apps have become essential tools in the lives of students, for both studying and free time. Some apps are specific for learning, while others help with communication and organization. Knowing how to use them well can improve productivity and well-being.
